THE MEXICAN HOPPING BEAN.

New Yorkers Take to Gambling With It.

(New York Journal.) The Mexican jumping bean has reached town. With it comes a new form of gambling, that will tax the efforts of Mr. gambling, that will tax the efforts of Mt.
Moss and the Mazot Committee to abolish.
On the corner of Fulton and Nansau
streets the only vender of the romarkable
bean has taken up his stand. For three
cays he has done a rushing business, and
his stock has been sold out, but more
beaus have been ordered, and it is said
a buskel of them are on their way from
Mexico to perplex and demoralize New
York.

Mexico to perplex and demoralize New York.

There is as much mystery about the beans as there was about the kissing hag. Here and there individuals with a woridly air and a globe-trotter appearance will tell you that they have seen the natives in the chies of Mexico gathered in groups on the street corners wagering odds on favorite beans, and already these groups have come to be noticeable in New York, perticularly in the neighborhood where the original vender took up his stand.

The bean is about half the size of a hazel nut, which it resembles in appearance and shipe, with the exception that one side is flat. Placed in any position, the bean immediately begins the most remarkable performance. It crawls along or jumps—sometimes a quarter of an inch.

A peculiar feature of the bean's action

The bean is about half the size of a bazel mix which it resembles in appearance and shape, with the exception that the side is flat. Placed in any position, he bean immediately begins the most recarkable performance. It crawis along a fortune at mining and had never arkable performance. It crawis along a fortune at mining and had never forgotten the loan, nor did he ever speak of the matter until two months ago, when the first news came to him of his long lost friend's death and bequest.

Federal Steel, preferred diagones Sugar, preferred in the first news making and had never forgotten the loan, nor did he ever speak of the matter until two months ago, when the first news came to him of his long lost friend's death and bequest.

is that it is utterly indifferent as to the direction it takes. It will take ten jumps along a straight line, and then, without any explanation, caimly jump back again. You can't control it. You might as well try to direct a cyclone. It jumps or crawls when and where it pleases. After remaining perfectly quiet for minutes at a time, it will suddenly start in for a lively performance, and keep it up for an hour.

That's where the betting comes in. Only two systems of gambling with the bean have been devised in New York, although in Mexico there are as many ways of risking money on them as there are bairless dogs. The methods of gambling here are by the circle and straight lines. Men who have purchased beens and grown proud of their performances meet and discuss the jumping qualities of their new discoveries. Two rival beans with records are placed in a circle and then fortunes change hands on which one will jump out first.

fortunes change hands on which one will jump out first.

There is no telling, even with the best trained bean. It may jump to the edge of the circle and then go to sleep while you are cursing inwardly as the other bean takes up its march to the goal. The other method of gambling is by drawing four straight lines around a bean. Then the wager, with odds of three to one, is on which line will be crossed first. What makes the bean jump is always for long a mystery. There seems to be no reason for it, and the performance partakes of the weird, but the secret his been discovered by an inquisitive New Yorker.

sgusted by ill luck, he chopped his ean in pieces and found that it was sean in pieces and found that it was sollow. Inside was a very lively worm, nearly as big as the bean. Its contorions and the shifting of its weight from ide to side accounted for the peripatetics of the Mexican bean.

The ship left New York ful trip down to Body Island. At 3:30 o'clock Thursday morning the Iroquois met the West Indian hurricane. The barometer fell to 28:39 and the wind blew at a well to 28.38 and the wind beew at a velocity of ninety miles an hour. There was a terrific sea and a deluge of rain. Captain Kemble slowed his ship down and took the storm as it came, and the Iroquois rode out the hurricane without a

erious mishap of any kind. Great relief was felt here when it was arned that the ship and all on board of

MYSTERIOUS SHOOTING AFFAIR. Robert Hand Seriously Wounded Near Bridgeton, N. J.

BRIDGETON, N. J., August 19.-Robert Hand, a son of Captain Ellis Hand, of Port Norris, N. J., was shot and dangerusly wounded late last night while riding on a bleycle along a lonely road near here. The night was very dark and as he was riding along he was sud-denly confronted by a man, who shot him without warning. The bullet entered Hand's right side.
The young man's assailant was subse-

quently arrested, and gave the name of Burke, and said he lived at Dorchester, his county. There is considerable mystery over the shooting, as there is no known cause for the attack. It is not known whether Hand will recover or not.

JOE JEFFERSON'S NEXT SEASON.

Will Be Supported by Three Sons-A Fourth Will Be His Manager.

(New York World.)

Joseph Jefferson, healthy and vigorous in spite of his advanced years and his severe illness of last winter, will continue to act this coming season in the plays in which he has won fame. Charles Jefferson, the comedian's eldest son, arrived in New York yesterday to arrange his father's coming tour.

"My father is spending the summer at Buzzard's Bay." he said, "and he is in the best of health. The Jefferson Comedy Company this season will include my father and my brothers—Thomas Jefferson, Joseph Jefferson, Jr., and William Jefferson—while I will act as manager." (New York World.)

BIG NEWS FOR WHEAT-GROWERS.

Russian Crop a Failure-Higher Farm Prices in the United States.

(New York World.)

LONDON, August 18.—Private advices to some of the foremost bankers here report that the Russian wheat crop will be a great failure.

This means, if true, higher prices for American wheat, and a continuation of the heavy exports from New York, as Eastern Europe will be partly dependent upon the United States for food stuffs.

Loan in Youth a Godsend in Age.

(New York Journal.) It was an unaccustomed trlp that a ainfield letter carrier made yesterday the dwelling place of H. W. Frazee, to the dwelling place of H. W. Frazes, old, indigent, and a cripple. But the letter he brought was a message of comfort, of fortune, of "bread cast upon the waters" returning after forty years. It was from W. E. Robinson, of Toledo, O., saying that the bequest of \$15,000 left to Frazee by W. P. Hedden, a western mining man, would be handed over to him years soon, now that the writer and his very soon, now that the writer and his fellow-executors had observed the necessary formalities, including the establish-

fellow-executors had observed the necessary formalities, including the establish ment of Frazee's identity.

That legacy, which will enable a man of failen fortunes to spend his decilning days in ease instead of penury, is the fruit or a loan of \$3.500, made when Franzee was a prosperous man—one of the pioneers of the "pony express" in New Jersey and a constant traveller between Plainfield and New York. Hedden was a friend of his, of whose business capacity he thought highly. The loan was to enable him to start a toy factory in Newark.

The venture failed, and nothing was saved from the wreck. Hedden struck out for the West, after assuring his friend that he would repay the money some day, with interest. But as the decades went by and no more was heard of him his benefactor put all thought of it from his mind.

Four years ago, when he had already fallen upon evil days, he was hurt in a runaway, accident, and was obliged to have one of his feet amputated. Since that time his prospects have been sad indeed.

He did not know that Hedden was mak-

STOCKS ARE STRONG

MARKET ACTIVE AGAIN, AFTER A BRIEF REACTION.

BANK STATEMENT RATHER PUZZLING.

After a Momentary Hesitation, How-

NEW YORK, August 19 .- The stock P., C., C. and St. L. .. market was strong and active again today, and after a brief period of hesitation and reaction, on the publication of the bank statement, new buying orders in a few conspicuous stocks lifted them to the top level of the day. There was some realizing at other points, under cover of this bidding-up of prices, and a few weak spots made the market rather irregular the close. Yesterday's vigorous upcolume of buying orders to the commiswas thus strong from the opening. The weekly reports from the various trade and commercial agencies, and the increased earnings of practically all of the railroads reporting, helped the upward movement.

Organized buying in Louisville and Tennessee Coal continued in evidence, and Central Pacific was bid up. Southern Pacific, in spite of large dealings, was held back by profit-taking, and shows only a modest net gain on the day. Louisville rose an extra 2½, and Tennessee Coal shows a net gain of 3½. The takings of St. Paul were on a very large scale, and were accompanied by rumors of an intention to declare an extra dividend on the stock.

NORFOLK AND WESTERN STRONG. NORFOLK AND WESTERN STRONG.
Other stocks notably strong were Norfolk and Western, common and preferred, the common gaining 1½. Pacific Coast, common and second preferred, rose 2½ points each. Hocking Valley, preferred; Atchison, preferred; American Cotton-Ofi. National Steel, preferred; Wirs and Steel, preferred, and a few other stocks show net gains of a point or over. On the other hand, Sugar, Brooklyn Transit, the Tobacco stocks, and some of the steel and fron stocks were under some pressure, and losses are shown here and there in the railroad list.

The bank statement was rather puz-

and there in the railroad list.

The bank statement was rather puzzling, in that the deposit liabilities were not increased by as much as the cash and loan increase, but the smallness of the changes left little ground for anxiety.

After a momentary hesitation, an optimistic view of the statement was taken. BONDS LESS ACTIVE. Bonds have been less active relatively

than during the week, and price move-ments have been irregular. The specula-tive issues generally are higher, the United States new 4's, coupon, have ad-vanced 3<sub>5</sub>, and the new 3's, coupon, 35 in

bid price.

The total sales of stocks were 253.845

The market for cotton futures opened quiet and unsteady, with prices unchanged to 2 points lower, after which there was little change. Trading was restricted almost exclusively to the professional element, which was averse to assuming new obligations, in the absence of influential news or backing from outside quarters. The Liverpool cables were somewhat disappointing, but not sufficiently so to bring out long cotton. The crop accounts and weather information failed to reveal any marked change in the situation throughout the belt overnight. The weekly reports from New England cotton centres report healthy conditions in all departments. Like news was received from Manchester and Continental points regarding the cloth markets of Europe. The market closed quiet, with prices net 1 to 2 points higher.
